

Clarkson Craftsman House 1:24 scale
assembly Instruction by
Laser Dollhouse Designs

NOTE 1: Please do a dry assembly only using tape to hold house together. This will get you familiar with parts, location, and fit. This also gives you a chance to visualize how you want to approach the build. Also read each step and adhere to items that should not be glued till a later time..

Materials for build;

1. Wood glue, you may use Titebond, Elmers, tacky or any good wood glue. Tacky wood glue dries clear and is preferred.
2. Masking tape to hold house in place during dry assembly and gluing.
3. Utility knife if needed for trimming.
4. 220 grit sandpaper.
5. Wood Filler
6. Paint, any acrylic paint.

House Assembly

Step 1. Complete dry assembly, next paint all parts and fit to house without painting to assure proper fit with paint.

Step 2. Locate base as seen in figure 1.

Step 3. Install interior walls and side exterior walls, each wall on the tab is listed to location on base. Match wall 1A to location on base 1A and so on. Figure 2. Next install 2nd floor onto first floor walls BUT DO NOT GLUE!! Weight down and allow glue to dry, figure 3.

Figure 43

Shingle install pattern

Step 1. Shingles not included in kit, purchase our asphalt shingles at www.laserdollhouses.com you will require 2 bags to complete house.

Install mid-roof shingles. To install shingles you may use wood glue or super glue. If using super glue wear thin rubber gloves to protect hands. Take a strip and lay upside down even to bottom edge, once on press each shingle down firmly to seat, figure 1. Next trim excess with a utility knife, make sure blade is new for clean easy cuts.

Step 2. Install next row of shingles by aligning each shingle square center to the slit of the lower shingle, figure 2.

Figure 1

Figure 2

Garage Assembly continued

Step 3. Continue with next row aligning next shingle row with top of the shingle cutout dividers, figure 3. Follow same process for remaining install to complete house, fig. 4.
