

Straight Staircase #2

1:12 scale

## Instructions for Assembly

Step 1. Determine if you want the rails on the left or right as you will align the treads on the opposite side even to the steps assembly.

Treads are even opposite side here....

Step 2. Install large landing tread at top, make sure it is even opposite side of rail and that the hole is closest to top riser. Also the landing tread should be aligned to the front of the stairs leaving a lip over final riser.

Even in front and opposite side rail against wall....

Step 3. Install handrail into tread holes with the tabs at bottom of each post. glue and hole down flush. Finally install top Newel post. Install stairs to Dolls House and install bottom newel post.
